

# GO WITH STO

Paid For By Howard Stoeck For Congress

## PRINCIPLE CAMPAIGN PLATFORM & POLITICAL PHILOSOPHY

Howard designed a 12% flat rate Personal and 3% Corporate income tax to replace our current tax, with personal exemptions, but eliminating all deductions, that has been certified workable by Emory University economists and nationally respected tax experts. This will reduce the IRS workload by 95%.

Enact a balanced budget. Economize government as if it were a business and Americans its shareholders. Implement Cost-Benefit analysis in Defense contracts, military spending as well as in every area of government.

Foreign Aid should be in kind, not in money and should clearly show the American Flag, painted on equipment, printed on food cartons and medical supplies. Let those people know that Americans care.

Support the ERA to proclaim that equal rights under the Law shall not be denied or abridged to anyone on account of sex.

Create the CIVILIAN WORK FORCE which will put people to work by obtaining the productivity of those not disabled, in return for the goods, services and funds dispensed by government, so that people could work and care for themselves.

Provide Child-Care centers for mothers on AFDC enrollment, so that they could put in their hours at the Civilian Work Force.

Replace the food stamp program with nutritious food, including its distribution by the Civilian Work Force.

Revise Child-Support recovery Laws, which will reduce the need for mothers to apply for AFDC or other Welfare enrollment.

Oppose legislation that has been offering temptations for Americans to be unproductive. Do not penalize us for our productivity; rather encourage the productivity of Americans.

Allow us the option of rejecting Social Security benefits, not pay into the plan; and provide for our retirement ourselves.

Oppose legislation which presumes that some American's morality is superior to others (i.e. Specific, oral prayer in school, a woman's freedom of choice to an abortion and other freedoms.)

Oppose Defense spending beyond that which is vital to the security of America. Watch military spending like a hawk.

Eliminate the National Labor Relations Board. If there is a breach of a union agreement, it should be regarded as any legal breach of contract, with no special interest status.

Allow American economy an opportunity to resolve itself within a free marketplace by eliminating farm and milk supports, oil depreciation allowances, frivolous tax credits or deductions, as well as any other special interest privileges.
